

Support implementation of environmental management system according to ISO 14001

Curaçao, 2012

Client info:

Name: Aqualectra

Sector: Power/Utility

Location: Curaçao

Aqualectra is Curaçao's utility company responsible for the production and distribution of power and water as well as the delivery of accompanying services.

Rationale: Aqualectra decided to introduce an environmental management system according to ISO14001 for all their locations and operations.

Approach: EcoVision organised workshops to introduce the system and to define environmental aspects. We set up an environmental aspect register including defining measures and methods to manage the aspects. We trained internal auditors. Yearly, we draft their environmental report.

Outcome: Aqualectra received and maintained their ISO14001 certificate.
