

## EHIA Waste Processing Plant Sint Maarten

*Sint Maarten, 2014*

### Client info:

Name: Synergy Renewables

Sector: Power

Location: Sint Maarten

Synergy Renewables is a global power company focused on renewable energy, waste-to-energy and biomass opportunities.

**Rationale:** The dump site on Sint Maarten is reaching its maximum capacity. The government has tendered for a waste processing plant with energy recovery. Synergy Renewables won this tender. Before contracting, Synergy had to identify and assess potential environmental and health impacts associated with all aspects and components of the proposed plant.

**Approach:** EcoVision conducted the assessment according to guidelines issued by the government of Sint Maarten. The assessment included consultation with NGO's and governmental departments, assessment of environmental and health impacts, visualization of future situation and drafting of mitigating measures.
