

Starting note for EIA extension reverse osmosis plant

Bonaire, 2015

Client info:

Name: Water- en Energiebedrijf Bonaire N.V. (WEB)

Sector: Energy/Utility

Location: *Bonaire*

Water- en Energiebedrijf Bonaire N.V. (WEB), or Water and Energy Company Ltd., was founded in 1963 and is owned by the Public Entity of Bonaire (OLB).

Rationale: WEB plans to develop a new up to date water facility, using reverse osmosis. Location options are the current location at Hato or a former Radio Holland location at Barcadera. WEB wants to start the legal EIA process. For this a starting note is required.

Approach: EcoVision has drafted a starting note, describing the current situation, describing the proposed project alternatives including intake and brine discharge, storage tanks and distribution network and describing applicable laws and needed permits.

Outcome: Mid 2016, a commission for guidance of the EIA process has been installed and the assessment has started, based on this starting note.
