

## Effluent Monitoring Program Refineria ISLA

*Curaçao, 2013 - ongoing*

### Client info:

Name: Refineria Isla Curaçao BV (ISLA)

Sector: Oil and Gas

Location: Curaçao

ISLA is a medium conversion petroleum refinery located at the Schottegat bay in Curaçao. It has a name plate capacity of 330,000 barrels per day. Since 1985, Refineria Isla is a subsidiary of Petr oleos de Venezuela SA (PDVSA.)

**Rationale:** According to its nuisance permit Refineria Isla Curaçao BV has to conduct a monitoring program of its waste water towards the Schottegat bay.

**Approach:** Monthly sampling of the waste water at the outlet of all final oil catchers and at all internal oil catchers at the refinery. Analysing the samples on the parameters as defined in the permit and drafting a monthly report.
