

Environmental annual report

Curaçao, 2010-2017

Client info:

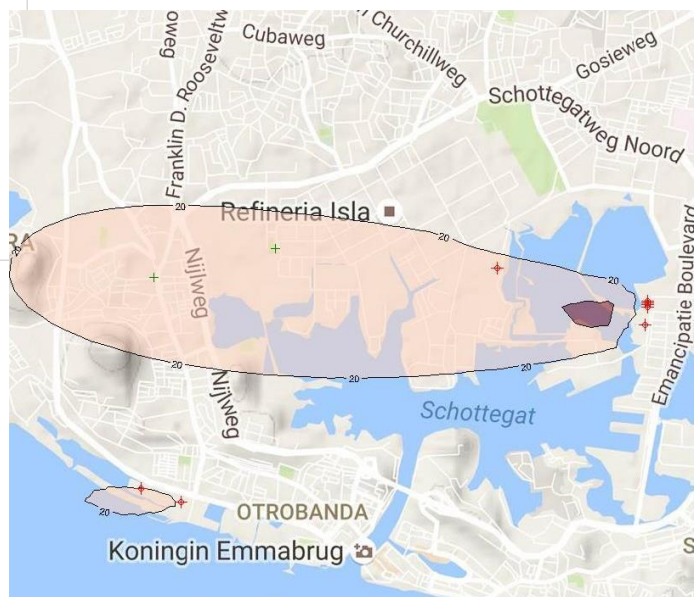

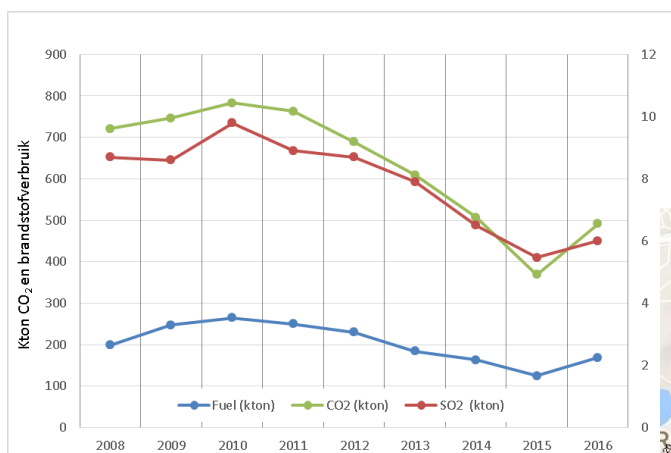

Name: Aqualectra

Sector: Power/Utility

Location: Curaçao

Aqualectra is Curaçao's utility company responsible for the production and distribution of power and water as well as the delivery of accompanying services.

Rationale: Aqualectra requires annual environmental reports in order to comply with their environmental management system (ISO 14001).

Approach: For the years 2008 till 2017 EcoVision has composed annual environmental reports for, and in collaboration with Aqualectra. These reports include among other things: an overview of the waste streams, consumption of chemicals, analysis of the effluent water quality, fuel consumption and determination of emission of air pollutants (including CO₂).

Outcome: An annual environmental report was composed for Aqualectra.
