

Environmental Impact Assessment for a solar farm at Bonaire

Bonaire, 2020

Client info:

CONTOURGLOBAL

Name: ContourGlobal

Sector: Power/Utility

Location: Bonaire

ContourGlobal is a developer, operator and owner of electric power businesses. The company manages, owns and operates 61 power plants, utilizing a wide range of fuel types, technology and equipment.

Rationale: ContourGlobal operates a 33 MW integrated wind and HFO power plant on Bonaire. ContourGlobal wishes to expand its power production capacity with a 5 MW solar farm, to be located next to its HFO power plant.

Approach: EcoVision performed the Environmental Impact Assessment and drafted the Environmental Impact Report (EIR). During the assessment alternative layout options were discussed with ContourGlobal, resulting in an adapted layout with less impact on nature.

Outcome: The EIR was issued to government in July 2020.
